***Election/Restriction***

Applicant's election with traverse of Group I in the reply filed on June 23, 2006 is acknowledged. The traversal is on the ground(s) that the method of using the modified molecular sieve of Group I is so closely related to the sieve itself that they should remain together. This is not found persuasive because the conversion uses a sieve made by the **method** of the Group I process. Accordingly, these are completely distinct methods.

The requirement is still deemed proper and is therefore made FINAL.

Applicant should note however, that the restriction is modified to the extent that Group I constitutes claims 1-13 and 18-20. Claims withdrawn are claims 14-18.

***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The declaration for William Borghard fails to set forth a legible zip code. Furthermore, the state of residence was not filled in in the box where "Pennsylvania" was deleted.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites "the catalytic molecular sieve of claim 12", but claim 12 is directed to a method.

***Allowable Subject Matter***

Claims 1-12 and 18-20 are allowable over the prior art of record. Although it would appear that calcination temperatures above 700C are known in general, and pre or post-steaming of selectivated catalysts at such temperatures are also known, it appears that the prior art considers that silicon selectivated catalysts

Art Unit: 1755

should be calcined at lower temperatures and the prior art does not teach or suggest high temperature calcination of these materials. If the hereinabove objections are obviated and the non-elected claims are cancelled, the application could be passed to issue.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
